

As a very staisfied satellite radio customer, I strongly urge the FCC to reject the NAB's petition 04-160. XM radio is a valuable source of all kinds of information, and provides a variety which cannot be found anywhere else. I regularly listen to the traffic and weather reports for the Washington, D.C. area, as I travel there frequently. I pay for the services that satellite radio provides, and it would be a great disservice to all satellite radio subscribers to limit the information available.

Respectfully,

William R Ballance
